Professional Summary

Final-year B.Tech Computer Science Engineering student (2027) with proven experience in full-stack development, AI/ML, Android, and cloud-native applications. Expert in building scalable, secure, and responsive solutions using Next.js, Python, Kotlin, Firebase, REST APIs, Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs). Strong focus on solving real-world engineering problems through data-driven design and AI-powered automation.

Education

VIT Bhopal University – B.Tech Computer Science Engineering (2023–2027)

CGPA: 8.35/10

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, Kotlin

Frontend: React.js, Next.js, Streamlit, Tailwind CSS

Backend: Node.js, Firebase, REST APIs

AI/ML: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, HuggingFace Sentence Transformers

Database: Cloud Firestore (NoSQL), MySQL (SQL)

Cloud: Google Cloud Platform (Firebase)

Tools: Git, GitHub, Android Studio, VS Code, Postman

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

AI Career Copilot – AI-Powered Career Intelligence Platform

GitHub – Live Demo

- Designed and deployed a full-stack platform with Next.js, TypeScript, Firebase, REST APIs, and Groq LLM for resume analysis, ATS scoring, personalized career guidance, and interview preparation.
- Implemented AI-driven resume parsing, skill extraction, job recommendation, and prompt-engineered LLM workflows to generate actionable career insights.
- Integrated Firebase Authentication, Cloud Firestore (NoSQL), and external APIs to build a scalable, secure, and responsive web application with real-time data handling and asynchronous logic.

AI Document Intelligence – AI-Powered Document Analysis Platform

GitHub – Live Demo

- Built an AI pipeline using Python, Streamlit, FAISS, HuggingFace Sentence Transformers, and Groq Llama 3.3 70B to perform Retrieval-Augmented Generation (RAG) and semantic vector search over PDF, DOCX, and TXT documents.

- Developed intelligent document summarization, context-aware question answering, and efficient retrieval mechanisms.
- Orchestrated text extraction, embedding generation, vector indexing, and LLM-powered conversational document analysis on Google Cloud Platform.

Smart Expense Tracker – Cloud-Connected Android Financial Management System

GitHub – APK

- Developed a Kotlin-based Android app with Firebase Authentication, Cloud Firestore, and MPAndroidChart for real-time expense synchronization, budget monitoring, and category-wise analytics.
- Delivered interactive dashboards, PDF report generation, and a modular architecture that enhances maintainability and performance.
- Leveraged Firebase's scalable infrastructure to support secure authentication and real-time data handling.

Certifications

- Google IT Support Professional Certificate
- Applied Machine Learning with Python (Coursera)
