PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student specializing in full-stack web development, AI/ML engineering, Android app development, and cloud-native solutions. Proven track record in building scalable, secure, and user-centric applications using Next.js, Python, Kotlin, Firebase, REST APIs, and Large Language Models (LLMs) with Retrieval-Augmented Generation (RAG). Passionate about solving complex software engineering challenges through modern architectural patterns, data-driven design, and automated intelligent workflows.

EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science Engineering | 2023 – 2027

Cumulative GPA: 8.35 / 10.0

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Kotlin

Frontend Development: React.js, Next.js, Streamlit, Tailwind CSS

Backend Development: Node.js, Firebase, REST APIs

AI/Machine Learning: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, HuggingFace Sentence Transformers

Databases: Cloud Firestore (NoSQL), MySQL (SQL)

Cloud Platforms: Google Cloud Platform (Firebase)

Tools & Utilities: Git, GitHub, Android Studio, VS Code, Postman

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

PROJECTS

AI Career Copilot – AI-Powered Career Intelligence Platform

- Architected and deployed a full-stack platform utilizing Next.js, TypeScript, Firebase, REST APIs, and Groq LLM for real-time resume optimization and automated ATS evaluation.
- Built intelligent resume parsing algorithms and prompt-engineered LLM pipelines to deliver customized career roadmaps and context-driven interview preparation.
- Integrated Firebase Authentication and Cloud Firestore to ensure asynchronous processing, real-time data persistence, and secure user data management.

AI Document Intelligence – AI-Powered Document Analysis Platform

- Engineered a Retrieval-Augmented Generation (RAG) solution using Python, Streamlit, FAISS, HuggingFace Sentence Transformers, and Groq Llama 3.3 70B.
- Developed high-speed vector search, document summarization, and context-aware query response systems across PDF, DOCX, and TXT file formats.

- Streamlined document ingestion, text chunking, embedding generation, and vector indexing pipelines deployed on Google Cloud Platform.

Smart Expense Tracker – Cloud-Connected Android Financial Management System

- Developed a native Android application using Kotlin, Firebase Authentication, and Cloud Firestore to enable real-time financial tracking and budget synchronization.
- Integrated MPAndroidChart to deliver interactive data visualization dashboards and implemented dynamic PDF export functions for expense reporting.
- Structured app architecture using modular principles to optimize runtime performance, improve maintainability, and ensure offline-first synchronization.

CERTIFICATIONS

- Google IT Support Professional Certificate
- Applied Machine Learning with Python – Coursera
