— GitHub: github.com/mohapatranirjhala-stack — LeetCode

PROFESSIONAL SUMMARY Results-driven Computer Science Engineering student (Graduation 2027) with hands-on expertise in full-stack web development, AI/ML engineering, Android app development, and cloud-native solutions. Proficient in Next.js, TypeScript, Python, Kotlin, and modern AI frameworks including Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), FAISS, and prompt engineering. Demonstrated track record of designing, building, and deploying scalable, secure, and data-driven applications to solve complex real-world engineering challenges.

Technical Skills

- Languages: Java, Python, JavaScript, TypeScript, Kotlin, Frameworks & Libraries: React.js, Next.js, Streamlit, Tailwind CSS, Node.js, Firebase, REST APIs, AI/ML: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, HuggingFace Sentence Transformers, Databases: MySQL (SQL), Cloud Firestore (NoSQL), Tools & Platforms: Git, GitHub, Android Studio, VS Code, Postman, Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Professional Experience

N/A

Projects

AI Career Copilot – AI-Powered Career Intelligence Platform

Architected and built a full-stack AI career platform using Next.js, TypeScript, Firebase, REST APIs, and Groq LLM to deliver automated resume analysis, ATS scoring, custom career guidance, and interview preparation.

Engineered prompt-driven LLM workflows for seamless resume parsing, automated skill extraction, and real-time personalized job recommendations.

Integrated Firebase Authentication, Cloud Firestore, and third-party APIs to construct a secure, responsive, and scalable web application with low-latency data handling.

AI Document Intelligence – AI-Powered Document Analysis Platform

Developed an enterprise-grade AI document intelligence system utilizing Python, Streamlit, FAISS, HuggingFace Sentence Transformers, and Groq Llama 3.3 70B.

Designed a Retrieval-Augmented Generation (RAG) framework enabling semantic vector search, intelligent document summarization, and context-aware query processing across PDF, DOCX, and TXT files.

Built an end-to-end automated text-processing pipeline covering text extraction, embedding generation, high-density vector indexing, and conversational document analysis.

Smart Expense Tracker – Cloud-Connected Android Financial Management System

Designed and deployed a cloud-connected mobile expense management system using Kotlin, Firebase Authentication, Cloud Firestore, and MPAndroidChart.

Implemented robust multi-factor authentication, real-time data synchronization, dynamic budget tracking, category analytics, interactive dashboards, and automated PDF export capabilities.

Established a modular Android application architecture aligned with a scalable NoSQL database structure to optimize system maintainability and performance.

Education

VIT Bhopal University
Bachelor of Technology in Computer Science Engineering (2023 – 2027)
CGPA: 8.35/10

Certifications

- Google IT Support Professional Certificate
- Applied Machine Learning with Python (Coursera)
