PROFESSIONAL SUMMARY

Results-driven final-year Computer Science Engineering student graduating in 2027 with hands-on experience in full-stack development, artificial intelligence, Android engineering, and cloud-based applications. Proficient in building scalable software solutions using Next.js, Python, Kotlin, Firebase, REST APIs, Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs). Demonstrates strong analytical problem-solving abilities, a test-first engineering mindset, and proficiency with modern AI coding environments.

EDUCATION

VIT Bhopal University (2023 - 2027)

Bachelor of Technology in Computer Science Engineering | CGPA: 8.35/10

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Kotlin

Front-End Development: React.js, Next.js, Streamlit, Tailwind CSS

Back-End Development: Node.js, Firebase, REST APIs

AI / Machine Learning: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, HuggingFace Sentence Transformers

Databases: Cloud Firestore (NoSQL), MySQL (SQL), Database Design

Developer Tools: Git, GitHub, Android Studio, VS Code, Postman

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

PROJECTS

AI Career Copilot - AI-Powered Career Intelligence Platform

- Engineered a full-stack career platform utilizing Next.js, TypeScript, Firebase, REST APIs, and Groq LLM for automated resume analysis, ATS scoring, career guidance, and interview preparation.
- Developed AI-driven resume parsing, skill extraction, and personalized recommendation engines using structured prompt engineering and LLM workflows.
- Integrated Firebase Authentication, Cloud Firestore, and third-party APIs to construct a secure, responsive, and scalable application with real-time data synchronization.

AI Document Intelligence - AI-Powered Document Analysis Platform

- Architected an AI document intelligence application using Python, Streamlit, FAISS, HuggingFace Sentence Transformers, and Groq Llama 3.3 70B.
- Implemented Retrieval-Augmented Generation (RAG), semantic vector search, automated summarization, and context-aware question answering across PDF, DOCX, and TXT files.
- Designed an end-to-end data pipeline covering text extraction, embedding generation, vector indexing, and conversational retrieval.

Smart Expense Tracker - Cloud-Connected Android Financial Management System

- Developed a cloud-enabled Android expense management app leveraging Kotlin, Firebase Authentication, Cloud Firestore, and MPAndroidChart.
- Implemented secure user authentication, real-time data synchronization, budget monitoring, category analytics, interactive dashboards, and PDF report generation.
- Built a scalable Firebase backend paired with modular Android components to optimize system maintainability, responsiveness, and user experience.

CERTIFICATIONS

- Google IT Support Professional Certificate
- Applied Machine Learning with Python - Coursera
